

Simple modern app icon for LyricLines, glossy translucent glass effect with frosted glass appearance, subtle gradient in music-themed colors, soft inner shadow, featuring a stylized music note combined with a waveform or lyric line, clean minimal design suitable for small sizes, neomorphic style with light reflection.

This icon features:

- A musical theme with a stylized music note and waveform
- Elegant glass effect with appropriate translucency
- Subtle gradient that complements the musical theme
- Light reflection details that create the glossy appearance
- Clean, modern aesthetic that clearly conveys the musical focus

371Minds Icon: An abstract representation of intelligence and creativity using blue and purple tones with layered glass effects that create depth and dimension.

This icon features:

- An abstract representation of intelligence and creativity
- Blue and purple tones that create a tech-forward appearance
- Translucent glass effect with depth through layering
- Subtle light reflections that enhance the glass aesthetic
- Clean, modern design that works well at various sizes

iKid Edventures Icon: Features a playful, educational design with a stylized book/block motif incorporating your brand's colors (teal, red, yellow, purple) with a translucent glass effect and light reflection details.

This icon features:

- A playful, educational theme with a stylized book/block design
- Brand colors (teal, red, yellow, purple) incorporated in a tasteful gradient
- Translucent glass effect with soft inner shadows
- Light reflection details that enhance the glossy appearance
- Simple enough design to work well at small sizes while maintaining its playful, educational character

iKid Edventures

This icon features educational building blocks in your brand colors (teal, red, yellow, and purple) with a highly realistic glass effect. The transparency allows light to pass through while maintaining the vibrant colors. The rounded edges and visible light reflections give it a premium, polished look that represents both education and playfulness.

371Minds

For 371Minds, I've created a glass brain design in blue and purple tones that symbolizes intelligence and creativity. The highly transparent glass effect features pronounced reflections and refractions that create depth and visual interest. The realistic glass textures and studio lighting highlight the premium quality of the design.

LyricLines

The LyricLines icon showcases a musical note and staff made of ultra-realistic glass. The transparency and light reflections create a sophisticated, premium look while clearly representing music and lyrics. The glass-like refractions and highlights add dimension and visual appeal to the design.

<https://cdn.abacus.ai/images/c49843b0-91d9-4f2e-b4cf-931acc071912.png>

Each icon features the realistic glass appearance you requested with high transparency, visible light reflections and highlights, glass-like refractions, rounded edges, and realistic glass textures while representing the essence of each brand.

1. **iKid Edventures:** Educational building blocks in your brand colors (teal, red, yellow, and purple) with a highly realistic glass effect. The transparency allows light to pass through while maintaining the vibrant colors, and the visible light reflections give it a premium, polished look that represents both education and playfulness.
2. **371Minds:** A glass brain design in blue and purple tones that symbolizes intelligence and creativity. The highly transparent glass effect features pronounced reflections and refractions that create depth and visual interest.
3. **LyricLines:** A musical note and staff made of ultra-realistic glass. The transparency and light reflections create a sophisticated, premium look while clearly representing music and lyrics.

Each icon features a truly glass-like appearance with high transparency, visible light reflections and highlights, glass-like refractions, rounded edges, and realistic glass textures - similar to the modern glass UI trend but with an even more pronounced realistic glass effect.
